

# FIGHT THE BITE

Day and Night

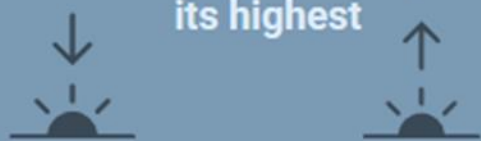

The Massachusetts Department of Public Health has raised the risk level for EEE for Framingham to **HIGH**.

EEE is a rare but serious disease caused by a virus that spread to human through the bite of an infected mosquito.

Residents are advised to take precautions to avoid mosquito bites:

**1** Refrain from outdoor activities from dusk and dawn when mosquito activity is at its highest

**2** Wear long-sleeved clothing and socks

**3** Use appropriate insect repellents

Deet

**4** Repair damaged windows and door screens

**5** Remove standing water from areas around your home.
