

**Field Trip Proposal**  
**Walsh Middle School Robotics Club**  
**13th Annual VEX Robotics World Championship April 21-26, 2020**  
**Louisville KY**  
**Advisor/Chaperone: Pascal Chesnais**

This entire field trip is contingent upon one or more of the Walsh Middle School teams qualifying for the VEX Robotics World Championship. While we have done so six out of the last six years, there is no guarantee and this trip may not happen. We will not know until at least the week of February 22nd if any Walsh Middle School teams have qualified.

**1. Safety and Supervision of all participants**

Pascal Chesnais, the Walsh Robotics Club current advisor, will serve as the chaperone for the five to ten Walsh MS students attending the World Championship. One or two Walsh Middle School Robotics team have qualified for the VEX Robotics World Championship each of the last six years and are hoping we will qualify one or two teams for the 2020 competition.

Throughout the event, the students and chaperones will stay in adjoining rooms at the Hampton Inn Airport which is walking distance from the Kentucky Expo center where the competition will take place. There are also shuttle buses to transport the students to and from the venue.

This will be a majority of students first time participating at VEX World Championships and we will review expectations on them and their parents as they represent Framingham on the world stage. The entire event takes place in the Louisville Expo Center and students remain in the building the entire day.

We expect a large number of parents to travel to the event to support their child at this event.

**2. Safety of transportation and accommodations**

**Departure/Return:**

Students will fly out of Logan airport on flights to be determined on April 21st. Students will be driven to the airport by parents and then picked up at the airport on Sunday, April 25th by their parents..

Once in Louisville, we will take a shuttle to the hotel and check in.

**Contact Info:**

Mr. Chesnais can be reached on his cell phone at 617-593-9272.

The REC Foundation has run the VEX Robotics World Championship since 2008 and expects more than 10,000 middle school, high school and college students to attend this year's event. This is the six year the event has been held at the Kentucky Expo Center.

The Expo center full security and first aid on the premises and has run this event for the last six years. In addition, parents will provide Mr. Chesnais with a medical release in the unlikely event there are any emergencies.

### 3. Anticipated Cost (estimated)

Item	Unit	Rate	# of Units	Total Cost
Travel	Airfare from Boston Logan to Louisville Airport	~\$550/person	10	\$5500
Accommodations	Four rooms at the Hampton Inn Airport	\$190 per night per room	3 student rooms; 1 chaperone room for five nights	\$3048
Competition	Registration fee	\$975/team	1	\$975
Food	Breakfast is included at the hotel, lunch and dinner will be provided	\$50/day/person	10 people for 6 days	\$3000
<b>Total Cost</b>				<b>\$ 12523</b>
<b>Per student cost</b>				<b>\$550*</b>

\*All costs are covered by the Walsh Robotics Club so that all students, regardless of ability to pay, are able to attend. The parents are asked to, but are not required to, donate money to cover the students airfare.

### 4. Expectation of fundraising by students

The Walsh Robotics Club is an after-school activity that is mostly self-funded (except for the school's funding for the advisor's stipend). All costs for the trip will be paid for through fundraising, gifts and donations. Student will be expected to participate in fundraising events in March, however it is not mandatory.

### 5. Time away from school

Students will not be missing class time as this trip occurs during the districts April break. All teachers will be notified in advance, so that long term projects may be scheduled accordingly.

Mr. Chesnais will be taking time away from his family to accompany students on this trip. Travel costs, airfare & hotel, will be paid with funds raised by the club for this trip. Mr. Chesnais will cover all his own meal costs.

### 6. Equity and Availability for Students

The Walsh Robotics Club is open to any Walsh students in good academic standing who is interested in designing, building and/or programming a robot. They may or may not choose to participate on a competition team. All team registrations and event registrations are paid for by the Walsh Robotics Club.

Any active member of a team that qualifies for the World Championship is offered the opportunity to go.

## 7. Educational Value/Benefit

At the World Championship, the students will compete on the world stage against the best robotics teams in the world. They will engage in STEAM activities and will work with students from more than 50 different countries to build alliances. They will develop their communications, science, math, engineering and artistic skills prior to, at, and after this event.

At the World Championship, the 2020-2021 game will be unveiled, which essentially assigns all of the robotics students in the world a year's worth of STEAM homework.
