Discussion and Vote on School Improvement Plans

Assistant Superintendent for PreK-12 Education Amy Bright shared a presentation on School Improvement Plan Updates that included the District's strategic objectives, measurable annual goals, school challenges, and the School Improvement Plans for each school. She noted that the Principals of each school were in attendance in case there were any questions.

Ms. Barnhill asked if there were any initiatives or incorporation into the District's Strategic Plan to help build relationships and make sure students have a trusted adult relationship within the schools. Ms. Bright said that this is embedded in different places, although calibrated in different areas throughout the schools. She said that it could be added to the Strategic Plan in the future, but more likely as action steps and not its own objective. Ms. Hugo said that we are hearing from parents that there are major behavioral issues that are all over the country, it can be hard to get proper Special Education supports for students without parent approval, and asked what can be done to get those students what they need and improve the school climate. Ms. Bright said that is a major concern of everyone in education nationally, with the pandemic and mental health crisis and maxed out services. She said that we can partner with the parent and speak to outside providers to build a plan to incorporate all stakeholders in the child's life.

She said it is not always a Special Education issue either, and there is a need to look at all supports, such as mental health and other tiers of support. She spoke about collaborating across the schools for responses to behaviors within the Code of Character, Conduct, and Support. Director of Health and Wellness Judy Styer spoke to relationships being fundamental to the success we are going to have, including relationships with parents.

Motion: To send the School Improvement Plans to the full School Committee for approval.

Moved: Ms. Hugo **Seconded:** Ms. Maskell

Discussion: Ms. Maskell asked for data on what attendance looks like for teachers and staff in every school as this has an impact on our students for consistency and lessons being taught.
